NLL332	400W	220-240/50Hz	200	32M	18Kgs	55(Db)

Compact Ride-on Scrubber Drier

RCM has launched world's most compact Ride-on scrubber drier 'ELAN' which can even pass through narrow passages like lifts metal detectors, etc. With working capacity of 3000M²/hr it is the most productive Equipment for all large facilities specially for multilevel complex, shopping malls, industries etc.

Ride on scrubber driers with working capacity upto 8000 sqm./hr. Are available on request

ELAN

Go 511C & Go 532

Auto Scrubber Driers

Compact machines with combined features of medium duty scrubber with vacuum suction drying. These machines have large clean water & dirty water tanks for effective cleaning without any interruption.

Byte

Advantages of Battery Version

No tangling cables, makes operation in public areas much convenient and accident free. Higher capacity strong batteries for uninterrupted usage of 2½ to 3 hours.

Injection Extraction Machines

Injection Extraction Machine specially useful for car upholstery, carpets & furnishings etc.

Vacuum Motor 230V;
Spray pump 48(W),
0.8 LPM at 2 Bar

Wet & Dry Vacuum Cleaners

Wet & Dry vacuuming machines for liquid & dust with useful accessories in shock proof material. Superior powerful motors with bypass cooling.

110V, 400Hz for Aircraft application available also

ATOM

Ride-on sweeper

Technical & commercial details on other models are available on request.

The RCM series of sweepers is one of the most extensive in the world and offers three complete ranges: walk behind, ride-on, ride-on high dump.

RCM sweepers have leading technical solutions and are built for high performance, long-life and reliability. The wide assortment of models and dimensions allows RCM customers to find the right correlation between quality and price. A rich choice of accessories ensures a personalized sweeper for all applications. The technical experience of RCM enables us to assemble special accessories for specific customer requests.

SLALOM

Powered Sweepers

ALFA

"HOG" Vacuum sweeper

Provides quick effective cleaning of all green lands for picking up leaves, papers, disposable glasses, fruit & vegetable peels, etc. With extension pipe it can pickup garbage from difficult areas like bushes etc.

Benefits of vacuum suction sweeper

- Cleaning of large areas in no time.
- Consistent high quality of cleaning.
- Fair acceptability of the machine with user
- Eliminates fatigue, adds dignity to monotonous work, achieving constant will to work.
- Complete collection & disposal of garbage.
- Dust free sweeping due to vacuuming on sweeping brushes due to making the machine's environment friendly.

Walk behind powered sweeper 3000-5000 m²/hr

Ride on powered sweepers 6,800-20,000 m²/hr

Street sweeper 20,222-28,000 m²/hr

Manual Sweeping Machine

A cleaning machine without any motor. The operator's hand-push gives motion to the wheels which drive the main and side brush. This is very simple and practical sweeper, especially suitable for cleaning small areas and narrow passages.

Cleaning capacity :1500 m²/hr

Cleaning width :700mm

Hopper capacity :35ltrs.

Weight :25kgs.

Pac-Vac Super Pro Vacuum Cleaner

The Productivity Machine! Vacuum over 700sq.

M/h easier, stronger & longer

Designed in Australia

110V,400Hz for Aircraft application also available

Industrial Wet & Dry Vacuum Cleaner

Large Wet n Dry Vacuum cleaners with single phase and three phase motors and Vacuum turbine, provided with useful accessories and efficient polyester filter with pulse jet filter cleaning system.

High Pressure Water Jet Cleaners

Due to our association with world leader in the field of high pressure pumps, we have the capability of offering machines for heavy duty cleaning & maintenance requirements suitable for many industries. Special accessories are offered to achieve impossible tasks.

Parameters	Unit	10/110	11/110	11/135	13/120	13/170	15/200
Water Flow	L. P. M.	10	11	11	13	13	15
Operating Pressure	Bar	110	110	135	120	170	200
Turbo Pressure (with Tornado nozzle)	Bar	170	180	210	190	285	300
Motor	KW/Volt	2.2/220	2.2/220/415	3/415	3/415	4/415	5.5/415
Total Stop	Y/N/Opt	Y	Opt	Y	Opt	Opt	Opt

High Pressure Blasters

High Pressure Jet machine up to 2500 Bar

Parameters	30/200	25/400	27/500	72/700
Water flow (lpm)	30	25	27	72
Operating Pressure(Bar)	200	400	500	700
Electrical Rating (415V) KW	190	18.5	30	71

Portable Cold Water Jet Cleaner

Versatile tool for all cleaning

Parameters	Unit	TKR	KB	PROLINER	
				Sv1310 TSS	Sv1510 TSS
Water Flow	L. P. M.	6	10	10	11
Operating Pressure	Bar	120	120	130	150
Turbo Pressure (with Tornado nozzle)	Bar	190	190	200	220
Motor	KW/Volt	1.6/220	2.6/220	2.6/220	4.8/220
Weight	Kgs.	12	20	37	37
Total Stop	Y/N/Opt	Y	Opt	Y	Y

Accessories:- Rotating Brush, Tornado (Roto) Nozzle, Floor Cleaner, Drain Cleaning Kit-Slurry Ejector (for tank cleaning applications), Sandblasting Kit -Nozzle & Lances for pipes/tubes & many more

Hot-Cold Water/Steam Jet Cleaning Machine

Even with general purpose cleaning and particularly with certain types of contaminants and heavy grease, wax or fats, all of which are virtually unaffected by cold water, hot water is quicker, more efficient and end result is usually of

11-30 LPM; upto 200 BAR; 40-150 C

Engine Operated water jet cleaner

Hot-Cold Water/Steam Jet Cleaning Machine

A portable petrol/Diesel engine driven, high Pressure fire fighting machine having easy mobility, independent from any electric supply, works on the principle of water mist to extinguish the fire. Machine is available with flow rate ranging 10-23 liters per minute, pressure of 100 bars which enables it for incredibly efficient suffocation of fire. Machine is easily maneuverable having a hose reel of mtrs, which makes it more suitable for inaccessible areas. This machine is multifunctional, can be used for high pressure cleaning as well.

Technical & commercial details on models are available on request.

Sales/after-sales support & services: Countrywide sales & services network, spare parts stock for off the shelf delivery, trained service engineers, annual maintenance contracts.
